THANK YOU!

The California Office of USDA's National Agricultural Statistics Service (NASS) and the California Department of Food and Agriculture (CDFA) appreciate the timely reporting by the State's vintners in preparation of the *2011 Grape Crush Report*. This report is available online at:

www.nass.usda.gov/ca

List of Publications

NASS and CDFA also conduct an annual acreage survey in partnership with California grape growers. *The Grape Acreage Report* contains information on new plantings and removals of grapes. *The Grape Acreage Report* is available on the NASS website at:

www.nass.usda.gov/ca

GROWERS AND VINTNERS

***Please notify NASS
of any crush report corrections
by February 17, 2012.***

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 2011 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 2012. The March 9, 2012 Final Grape Crush Report will contain any late reports or corrections to the preliminary report. **Please notify us of any corrections for the Final Grape Crush Report by February 17, 2012.**

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2011 crush totaled 3,869,894 tons, down 3 percent from the 2010 crush of 3,986,314 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,917,132 tons, down 7 percent from 2010. The 2011 white wine variety crush totaled 1,425,557 tons, down 7 percent from 2010. Tons crushed of raisin type varieties totaled 372,551, up 36 percent from 2010, and tons crushed of table type varieties totaled 154,653 up 25 percent from 2010. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2011 season, this total was 598,365 tons, approximately 15 percent of the 2011 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

The 2011 average price of all varieties reached a record high of \$588.96, up 8 percent from 2010 and 3 percent above the previous record high set in 2009. Average prices for the 2011 crop by type were as follows: red wine grapes, \$702.70, up 12 percent from 2010; white wine grapes, \$541.11, up 8 percent from 2010; raisin grapes, \$265.15, up 23 percent; and table grapes, \$219.20, up 26 percent.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2011, Chardonnay accounted for the largest percentage of the total crush volume with 14.4 percent. Cabernet Sauvignon accounted for the second leading percentage of crush with 9.9 percent of the total crush. The next eight highest percentages of grapes crushed included wine and raisin grape varieties. Thompson Seedless, the leading raisin grape variety crushed for 2011, held 8.4 percent of the total.

District 13, (Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)), had the largest share of the State's crush, at 1,494,796 tons. The average price per ton in District 13 was \$337.19.

Leading Varieties Crushed PERCENT OF TOTAL 2011 CRUSH

Source: USDA, National Agricultural Statistics Service, California Field Office

*Synonyms for variety names are shown on Page 5.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,407.56 per ton, up 5 percent from 2010. District 3 (Sonoma and Marin counties) received the second highest return of \$2,081.12, up 3 percent from 2010. The 2011 Chardonnay price of \$752.30 was up 5 percent from 2010, and the Cabernet Sauvignon price of \$1,147.10 was up 11 percent from 2010. The 2011 average price for Zinfandel was \$559.00, up 26 percent from 2010, while the Merlot average price was up 13 percent from 2010 at \$691.05 per ton.

GRAPE CRUSH, DOLLARS PER TON 2002 - 2011

Source: USDA, National Agricultural Statistics Service, California Field Office

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2011 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2010 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2011 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2010 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2011 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2010 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2011 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2010 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2011 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2010 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2011 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2010 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy; this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2012 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The next example indicates the method used for calculating weighted averages.

The following two purchases were made.

Variety	District	Tons	Degrees Brix	Base Price	Price Paid Per Ton	Acceptable Brix Limits	Brix Adjustment Factors	Brix Adjustment Limits
Petite Sirah	1	155.5	20.6	\$450.00	\$364.50	19 - 25	+ or - 10%	Base 22, Min 20, Max 24
Petite Sirah	1	20.5	19.0	\$450.00	\$418.50	19 - 25	+ or - 10%	Base 22, Min 20, Max 24

Note: The variety, district, base price, and Brix Adjustment Factors (including Brix limits) are the same. The tons purchased, degrees Brix, and price paid per ton are the only differences in this example.

Step 1: Multiply the tons by the Brix for each lot purchased and then add the products to get the total. Also, add the tons purchased.

Variety	District	Tons	Degrees Brix	Total (Tons X Brix)
Petite Sirah	1	155.5	20.6	155.5 X 20.6 = 3,203.3
Petite Sirah	1	20.5	19.0	20.5 X 19.0 = 389.5
TOTALS		176.0		3,592.8

Step 2: Divide the total (3,592.8) by the total tons purchased (176.0) to get the **Weighted Average Degrees Brix**.

$$\frac{3,592.8}{176.0} = 20.4$$

Step 3: Multiply the purchased tons by the Price Paid Per Ton for each lot purchased and then add the products to get the total.

Variety	District	Tons	Price Paid Per Ton	Total (Tons X Brix)
Petite Sirah	1	155.5	\$364.50	155.5 X 364.50 = 56,679.8
Petite Sirah	1	20.5	\$418.50	20.5 X 418.50 = 8,579.3
TOTALS		176.0		65,259.1

Step 4: Divide the total (65,259.1) by the total tons purchased (176.0) to get the **Weighted Average Price Per Ton**:

$$\frac{65,259.1}{176.0} = \$370.79$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2011 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2010 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2011 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2010 are shown. *(Table 9 only appears in the Final Grape Crush Report.)*

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2011 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2010 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

* Synonyms for variety names are shown on Page 5.

a/ See code descriptions in Table 8 - Supplement: 2011 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price.

e/ All prices based on per Degree Brix.

TABLE 8 - SUPPLEMENT: 2011 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT; 2011 BRIN ADJUSTMENT FACTORS

The following Brin adjustment factors are on a per degree Brin basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brin acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brin, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.
